Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>The curriculum is comprehensive and covers six learning domains by the guidelines of the Education Bureau, and a variety of learning activities are prepared according to children's abilities and interests. Through multiple learning games and activities, children can develop their self-directed learning attitude towards exploration, thinking, and asking questions, as well as the skills of learning and construction of knowledge. And based on the truth of the Bible, we cultivate children's moral education.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Based on the theme of children's life experience, through different teaching strategies such as "picture book", "drama", and "project approach", the spiral curriculum and learning activities implemented through free-play enhance interaction between children, adults, and the environment. To inspire children's self-learning spirit, develop personal learning potential, and cultivate initiative exploring and thinking skills to promote the balanced development of children's knowledge, skills and attitudes.</p>	
Assessment of children's learning experiences	
<p>Teachers continuously evaluate the academic, physical and mental development of children, through observation, recording and analysis to assess children's performance in actual learning. Each semester, we distribute "children learning and development portfolios" which allow parents to better understand children's learning activities and overall development through photos.</p>
