Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Thematic teaching Through different theme; comprehensive language, mathematics, general knowledge, arts, music and physical allows children to learn happily and interestingly, which supports learning confidently, being active and a focus learning attitude. Project approach teaching Teachers encourage children to approach different people, events, objects and the surrounding environment to develop interest in learning, explore their acquired understanding of the world, and increase the cognitive skills and social development. Fun English Through spiral English course, children listen, speak, read and write from learning simple to hard which masters their listening, speaking, reading and writing skills in English. Oxford English Phonics Course Through games, story and drama elements, allows children to master phonics - (no difficulty in spelling) Fun Chinese (Putonghua) Through interesting cartoon cards children learn the Chinese radical from the Chinese words. Using scenario to create sentences (create sentence), using sentence to create and extend short paragraphs.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The child-oriented approach is adopted. The contents of teaching are designed to arouse children's interest in learning. Pronunciation of the Chinese and English languages is emphasized. Different themes are set for learning. Problems with different extent of difficulties are set in story-based formats for solution and exploration as a way to train different levels of thinking. Active and passive learning activities are conducted in various forms held in whole school-level, grade-level, class-level; individual and group learning activities are also provided. Topic studies and theme-based extended activities are designed to let children learn in action and explore new knowledge. The interest corner with rich content is created and the high scope grouping is adopted. We respect children as independent learners and create opportunities for them to learn and practise the process of 'planning, action and review'. All these are supported with various learning activities to enrich their learning experiences.</p>	
Assessment of children's learning experiences	
<p>Children's learning efficacy is observed and assessed on an ongoing basis. Through the profile on a child's learning progress, parents understand their child's learning at school and development.</p>	

School Characteristics	
School vision and mission

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Focusing on child-centredness, our curriculum places emphasis on developing children's knowledge, skills, values and attitudes. The curriculum involves six learning areas, providing all-rounded, balanced and appropriate education, while at the same time nurtures children's development in Moral, Cognitive and Language, Physical, Affective and Social, as well as Aesthetic. We aim to provide appropriate care to meet children's development on growth, ability, interest and experience. We respect the individuality of each child and will exercise flexibility in teaching. Special subject teachers will be arranged to hold activities on biliteracy and trilingualism.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>We focus on the needs of children and nurture their interest in learning with emphasizing on developing their biliterate abilities. By providing different learning themes to enhance children's learning experiences, arousing children to solve and explore with developing their creativity through reading stories. Using picture books to enrich our theme content and design interesting, diversified integrative activities. Indoor and outdoor activities come in different forms. The online parent-child reading programme provides English / Chinese book recommendations that give guides to parents to help promote reading culture and foster children to love reading at an earlier stage. Various interest corners have been set up in classrooms. Children can explore new knowledge through games and activities by learning with five senses. In line with self-selected group learning, children can conduct self-directed learning through "plan, do and review" which cultivates them as active learners.</p>	
Assessment of children's learning experiences	
<p>We adapt both formative and summative assessments, which include reports on knowledge, skills, values and attitudes. Through daily observation and different teaching themes, teachers can assess children's continuous development and will provide reports on picture book activities, behavioral observation and work analysis. Assessment reports that summarize children's overall learning development will be distributed twice a year. Learning Portfolio with all reports and photos of children in various learning activities will be distributed.</p>	

School Characteristics	
School vision and mission	
<p>We aim to provide all-round quality services and strive for continuous improvement. We endeavour to promote all-round development of children through a balanced curriculum in the domains of Moral, Cognitive and Language, Physical, Affective and Social, and Aesthetic, to lay foundation for whole person development.</p>	
Support to students	
<p>Teachers and school social workers often observe children's behaviour to offer help and care if necessary. New students will join accommodation classes and teachers will communicate closely with parents. Students will have primary school visits to prepare for their new school life.</p>	
Support to non-Chinese speaking (NCS) students	
<p>Received Grant for Support to NCS Students; create an inclusive learning environment to facilitate students' integration; Teachers will use various ways to deepen students' knowledge in social environment, facilities and local culture. We will design games to enhance their motivation on using Chinese language and to enforce their listening, speaking, reading and writing skills.</p>	
Support to students with special needs	
<p>Joining the On-site Pre-school Rehabilitation Services. We respect the diversity of children and by joining services to support children's learning and development. Qualified and experienced teachers will keep in touch with parents to care for children's health and growth.</p>	
Link with parents	
Parent-teacher association : No	
Other activities / communication with parents	
<p>Parents can have a better understanding of our mission through parent meeting, class observation and seminar. We will contact parents and collect their opinions by phone and interviews. Online communication will be used and will invite parents of alumni to join school activities to share their experience.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our developmentally appropriate curriculum nurtures a loving heart, cultivates the mind, develops potentials and promotes creativity. Through joyful learning, specially designed curriculum in linguistic, STEM (science, technology, engineering, mathematics), art, music and physical activities, students are confidence and proactive learners; ready for both local and international primary schools. In compliance with EdB's Pre-primary school's curriculum guideline (2017), our students will not be engaged in any writing activities in K1. Nor do we give excessive homework and repetitious exercises to our students.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>Through "theme based" and "inquiry based" activities, students learn in small groups. Through interacting with caring teachers, students develop their linguistic, music, art and motor skills. Our "Free choice Learning Corners" and "Free Play Areas" give children ownership of their learning experience. It's a way for children to expand on what they are learning and explore their own interests. Supporting young children's autonomy has been found to have far-reaching positive effects on the child's development, including benefits to executive function, mastery-related behaviours and general socialisation.</p>	
Assessment of children's learning experiences	
<p>A student's portfolio is a record of students' involvement in learning which is designed to demonstrate success, growth, higher-order thinking, creativity, assessment strategies, and reflection. It provides a picture of each student's progress and development of knowledge, conceptual understanding, transdisciplinary skills, attitudes and the attributes of the learner profile over a period of time both as an individual learner and as group learners.</p>

Curriculum planning	
<p>We design appropriate child-oriented curriculum according to children's growth needs, abilities, interests and life experiences. We take into account the development of children's multi-intelligences and nurture children's knowledge, skills, values and attitudes; Children learn and construct knowledge through sensory exploration. We also organize different extracurricular activities based on the different themes, and let children participate in a relaxed and pleasant environment.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>The curriculum design is child-centred, the starting point being inspiration and guidance. It includes different teaching approaches such as "Thematic", "Project Approach" and "Project learning". Children learn through music, games, stories and activities that are diversified, coherent and explorative. It also provides sensory learning through exploration and experimentation. It inspires children's multi-intelligence and let children master the ability to learn independently. The experience gained by children through these activities can be applied in their daily life.</p>

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
Child-contentedness, Whole child development, Learning through Play	
We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.	
Learning / Teaching approach & activities	
Creating a diverse environment for children of different nationalities to learn knowledge, engage and interact. Our children learn the importance of respecting and appreciate life through our little garden settlement in campus. They earn creativity and art through having a green school life. Through a green creative school learning experience, children can explore different possibilities, enhance abilities and increase interest to learn, explore and be creative.	
Assessment of children's learning experiences	
Children are being continuously assessed in different developmental areas in our school. Assessments are conducted by all parties involved in a child's learning journey.	

School Characteristics	
School vision and mission	
We are determined to provide young children with a Christ-centred education. Let them imitate the humility, simplicity and trust in God as exemplified by our patron saint, St. Teresa of Lisieux, so that we may nurture them to be positive, happy and healthy as they grow up. Following Christ's example of love and service, we strive to actualize the core values of Catholic education. Through this, we nurture our young children by fostering positive values and an optimistic outlook on life, so that they may learn to be thankful in all things, persistent in prayer, willing to serve others, and jointly with their families, be prepared for a healthy and happy life.	
Support to students	
We arrange an orientation week for the children to gradually adapt to their new environment in school and build their confidence. For the differences in children's learning ability, our mode of teaching is flexible as to adapt to the needs of the children; with appropriate support and guidance provided for children and parents with individual needs.	
Support to non-Chinese speaking (NCS) students	
Received Grant for Support to NCS Students; create an enriched language environment for mastery of the Chinese language; create an inclusive learning environment to facilitate students' integration.	
Support to students with special needs	
Joining the On-site Pre-school Rehabilitation Services.	
Link with parents	
Parent-teacher association : No	
Other activities / communication with parents	
Parents are encouraged to participate in their children's learning through volunteer work, visits to the school and field trips. This helps to create a better bond between the children and their parents as family is a core value in our school.

Curriculum planning	
<p>The curriculum is formulated with reference to the Guide to Pre-primary Curriculum prepared by the Curriculum Development Council of the Education Bureau. It is child-centred curriculum designed in accordance with children's learning abilities and interest. • To help children develop the abilities to 'listen', 'talk', 'read' and 'write' so as to promote the learning of languages. • 'Christianity course' is provided to promote spiritual development so children follow the example of Jesus Christ's 'love'. • 'Putonghua and English language courses' are provided to develop bi-literate and tri-lingual abilities so they are confident to communicate in these languages. • 'Life education' fosters positive and active outlook on life and character, so that children learn to be thankful, love themselves and the others and cherish their lives. • 'Orff music course' integrates various arts such as music, dance, drama, literature and drawing to stimulate development of children's potentials, imagination and creativity.</p> <p>We will follow the "Kindergarten Education Curriculum Guide" (2017) to plan curriculum. Children of nursery classes will not be asked to write, and there will not be mechanical copying exercises and drills on calculation.</p>	
Learning / Teaching approach & activities	
<p>• Theme-based, activity-based and project approaches are adopted. • Various learning media are employed. Through multiple ways of learning, children are fostered to learn voluntarily, ready to try and develop problem-solving ability and innovation through projects, observation, exploration, group sharing, site visits, and application of technology. • Children are also arranged to learn through games to enhance their interest in learning.</p>	
Assessment of children's learning experiences

Curriculum planning	
<p>Through careful observation, the Montessori Guides will guide each child as he enters into various special developmental periods, and provide relevant materials that feed his interest. Each child will experience explosive growth in the different areas of academic learning, at the exact moment when he is developmentally ready.</p>	
Learning / Teaching approach & activities	
<p>Our Guidepost Montessori prepared environment is supportive and inclusive. Children choose their work and work independently, with partners or in small groups, learning to set goals, challenge themselves, and tackle complex problems. Each child practices leadership and responsibility, playing a role as a mentor to younger students, caring for the school environment, and engaging meaningfully to resolve classroom issues. We take full advantage of the Montessori three-hour work cycle, where children choose and organize their own work. Children come to create, understand, structure, and iterate their learning goals - to work both independently and collaboratively - and to persist in difficult thinking and creative work.</p>	
Assessment of children's learning experiences	
<p>Guidepost Montessori follow a rigorous child-centred educational program that aims to actively observe each child, listening and actively responding to their questions, interests and stories. Each child at Guidepost Montessori is immersed in a dual-language environment with both an English and Mandarin guide supporting them; assessment through observation.</p>	

School Characteristics	
School vision and mission	
<p>Journey to independence. The ultimate goal is authentic, holistic independence. This means the knowledge, confidence, creativity, and social ability a child will need in order to choose his own goals, whatever they may be, and pursue them over time. These are the qualities of character and mind that add up, in the end, to a happy and fulfilling adult life. Throughout their journey at Guidepost Montessori, each child gains a piece of this puzzle. Guidepost Montessori programs are designed to support children in taking full advantage of the early years, laying the foundations for a future of limitless possibilities.</p>

Curriculum planning	
<p>The school offers two bilingual streams: - Italian / English, supplemented by Chinese and Chinese culture - Chinese / English, supplemented by Italian and Italian culture. All class teachers are native-speaking teachers. The school offers a balanced and appropriate curriculum according to the children's physical and mental development and learning interests. According to the different projects, the teachers lead the children to actively explore, think and learn from the Reggio learning experience, so as to enrich their life experience and acquire integrated knowledge.</p>	
Learning / Teaching approach & activities	
<p>The school: - Collaborates directly with Reggio Children; - Values the wide variety of different cultures and languages that are native to the students; - Promotes the development of children's literacy with the aid of different media used in the teaching process; - Encourages the acquisition of general and interdisciplinary study skills; - Encourages the ability of adapting as a means of change and innovation; - Promotes bilingualism;</p>	
Assessment of children's learning experiences	
<p>Putting an emphasis on children's physical and mental development and life experiences, the school also evaluates the children's academic performances and development in other aspects based on on-going observation, records and analysis. More specifically, teachers set up a "Student's Portfolio" to collect students' personal data, work and performance in various subjects.</p>	

School Characteristics	
School vision and mission	
<p>The educational philosophy of the Italian International Nursery & Kindergarten is based on the Reggio Children Approach. Furthermore, the Italian International Nursery & Kindergarten is the first school in Hong Kong to cooperate directly with Reggio Children, the famous Italian educational institution originated in Reggio Emilia, which inspires schools in more than 110 countries in the world. Reggio Children's biggest contributions are to disciplines such as pedagogy, philosophy, architecture, didactics, which are to be intertwined and in constant dialogue amongst each other. The idea behind the School is not only rooted in traditional Italian educational philosophy, but it is similarly projected towards the future, encouraging research, innovation, the neurosciences, and the continuous experimentation of new educational approaches.</p>	
Support to students	
<p>- Provides new students with an adjustment period and an orientation programme, organizing parent meetings for new students as well. - Respects the uniqueness of every child, focusing on children with special educational needs and providing them with appropriate support. - Provides high-grade children with effective support to prepare for P1 school life and holds P1 admission seminars for their parents.</p>

<p>Our broad and rich Early Years Curriculum is enriched with many local visits and visitors. Parents are actively involved supporting visits, special curriculum days as well as regular weekly activities such as cooking and reading. Teachers communicate with parents via a Home-School Diary and parents can write comments in return. A curriculum information evening is held early during the first term to give parents a good insight into the way learning is approached in Reception. Other useful information for parents is found in a school wide weekly 'K News' newsletter emailed directly to parents.</p>

Curriculum planning	
PIPS, an authorised IB World School, develops its own concept-driven Programme of Inquiry based on the IB-PYP curriculum guidelines. Our curriculum integrates skills and knowledge across disciplines to promote deeper understandings.	
Learning / Teaching approach & activities	
Our hands-on, inquiry based learning and teaching focuses on the learner's holistic development. Learning engagements develop children to be inquirers, knowledgeable, thinkers, communicators, principled, open-minded, caring, risk-takers, balanced and reflective.	
Assessment of children's learning experiences	
Observation-based formative and summative assessments supplemented with portfolios, student-led conferences and report cards.	

School Characteristics	
School vision and mission	
Please refer to the school website.	
Support to students	
Our small class size and high teacher-child ratio (1:9) cater for children's individual needs where children with varying abilities are challenged at their own level. We also value home-school collaboration and parent education to promote children's development.

Woodland Pre-Schools respect the image of a child, and believe that each child deserves the best for them to grow socially, emotionally, physically and developmentally, to become great global citizens. By building the foundations of independent learning step by step, the Woodland Journey prepares children for a successful transition into primary school following the English Early Years Foundation Stage Curriculum with English, Mandarin and Bilingual options.	
Learning / Teaching approach & activities	
Woodland Pre-Schools' approach is to encourage children to learn through discovery, inspiring each child to fulfil their unique potential. Our play-based inquiry curriculum respects the image of the child and is beneficial for future studies as it places the child's questions, ideas, and observations at the centre of their learning experience. Children learn to be responsible for their own learning and build their knowledge through experience and exploration.	
Assessment of children's learning experiences	
We have two assessments per year, newsletters, and regular communication formally and informally with our Woodland community. Teachers use SWAY/Tapestry to share class information and child development information with families.	

School Characteristics	
School vision and mission	
Our mission is simple; we aim to fulfil every child's unique potential, we do this by following the simple ideal of nothing without joy. The Woodland approach inspires children to learn through discovery, to be collaborative and to make their own choices and decisions. Through our flexible and open-ended play-based classes, we strongly promote creativity and independence of thought; essential attributes for a child growing up in the modern world. Our children are confident, independent and have a love of learning the essential foundation on which their primary education can be based.

Curriculum Details	
Curriculum type : Local	
Curriculum planning	
<p>Our school is an authorized International Baccalaureate (IB) World School. Our curriculum is inquiry based which encourages children to ask questions and participate in problem-solving activities to foster children's self-exploration, self-discovery and self-construction experiences. We use an early childhood-specific framework for maker-centered learning while also nurturing other generative cognitive dispositions and habits of mind at this critical stage of development. We are also a partner school with Columbia University's Teachers College Reading and Writing Project. The children learn skills and strategies to become confident readers and writers in both English and Chinese.</p>	
Learning / Teaching approach & activities	
<p>English, Cantonese and Putonghua are used as the medium of instruction. Immersion method of learning is used to allow the children to become fully immersed in English, Cantonese and Putonghua. The children will naturally develop listening and speaking skills, while laying a firm foundation for reading and writing.</p>	
Assessment of children's learning experiences	
<p>Systematic observations and records are an ongoing type of assessment in school. We also collect samples of the children's work continuously throughout the school year in order to document their learning progress.</p>	

School Characteristics	
School vision and mission	
<p>To be a positive and open-minded community, where children can become caring and respectful inquirers, who will develop into internationally minded lifelong learners.</p>	
Support to students	
<p>We provide extra support in various areas to fulfill children's need for learning.</p>
